

Run Confidently with Secure Devops

Cloud apps need a new security stack

Modern cloud apps are built using CI/CD and run as containerized microservices. Security and DevOps teams risk being left behind. Legacy tools can't shift security left, validate configurations or provide detection and response for production workloads. What's needed is a container and cloud security stack built on open source innovation, with deep and unified visibility across workloads and multi-cloud infrastructure.

Secure containers and cloud

With the Sysdig Secure DevOps Platform you can securely run containers, Kubernetes, and cloud. Only Sysdig has the deep visibility needed to see all threats, vulnerabilities, suspicious activity, and configuration issues. Sysdig is a SaaS platform, built on an open source stack that includes Falco, sysdig OSS, and Cloud Custodian.

SECURE THE BUILD PIPELINE

- ✓ Automate scanning within CI/CD pipelines and registries
- ✓ Efficiently flag vulnerabilities and identify owners
- ✓ Block vulnerable images from being deployed

DETECT AND RESPOND TO RUNTIME THREATS

- ✓ See all threats with Falco, the open standard for detection
- ✓ Prevent lateral movement with Kubernetes network policies
- ✓ Conduct incident response using detailed records

CONTINUOUSLY MANAGE CLOUD POSTURE AND COMPLIANCE

- ✓ Save time with out-of-the-box policies for PCI, NIST, SOC2
- ✓ Identify misconfigurations and compliance violations
- ✓ Measure progress with detailed reports

MONITOR CONTAINERS, KUBERNETES, AND CLOUD SERVICES

- ✓ Prevent issues by monitoring performance and capacity
- ✓ Accelerate troubleshooting using granular data
- ✓ Scale Prometheus monitoring across clusters and clouds

Sysdig At-a-Glance

LAUNCHED: 2013

HEADQUARTERS: San Francisco, CA

VALUATION: \$1.19 B

CEO: Suresh Vasudevan

CTO AND FOUNDER: Loris Degioanni, Wireshark Co-Creator

FUNDING: \$394 M Total Funding by Accel, Bain Capital, DFJ Growth, Glynn Capital, Goldman Sachs, In-Q-Tel, Insight Venture Partners, Next47, Premji Invest, and Third Point Ventures

“We’ve instrumented Sysdig into our pipelines where it is executing container vulnerability and compliance checks on containers as they’re promoted into our production environment. Those automated checks allow us to move faster.”

SAP Concur

Company Key Milestones

Sysdig founded by Loris Degioanni, co-creator of Wireshark.

Sysdig Monitor, the first container-native monitoring service launches.

Introduces Sysdig Secure.

Sysdig becomes certified Red Hat OpenShift. Sysdig Monitor 3.0 delivers enterprise-grade Prometheus Monitoring. Joins AWS Marketplace for containers. Introduces "IBM Cloud Monitoring with Sysdig" service for IBM Cloud customers.

Introduces the Sysdig Secure DevOps Platform. Availability on Google Cloud Anthos.

IBM Cloud Monitoring with Sysdig expands to include Sysdig Secure.

Sysdig named to the Deloitte 2020 Technology Fast 500™ List.

Introduces cloud security posture management.

Open Source Key Milestones

Launches sysdig open source Linux visibility tool.

Sysdig introduces Kubernetes support in Sysdig Inspect open source. Declared a linux.com "project to watch."

Sysdig team launches Falco, the open source Kubernetes runtime security project.

Sysdig launches support for Prometheus metrics.

Donates Falco to Cloud Native Computing Foundation® (CNCF®), sandbox project.

More than 10M open source downloads; introduces eBPF instrumentation.

Falco accepted as a CNCF® incubation-level hosted project.

Contributes Falco system call capture stack to CNCF.

Sysdig: Run Confidently with Secure Devops

“ Troubleshooting, forensics, and audit can be handled at scale when you have a single source of truth across the teams. This shared understanding allows the team to address issues more quickly and maximize application availability.”
