sysdig + cybereason©

Cloud attackers move fast.
Sysdig and Cybereason help you move faster.

LEARN MORE →

10 minutes — that's all it takes to execute an attack in the cloud after discovering an exploitable target. Outpacing attackers requires security teams to meet the **5/5/5 Benchmark**, which specifies 5 seconds to detect, 5 minutes to triage, and 5 minutes to respond to threats.

Detect, Investigate, and Respond Faster

Sysdig and Cybereason help you focus on the most important tasks, such as investigating and resolving critical threats while improving MTTR and MTTD metrics.

Together, our solutions consolidate insights across clouds, endpoints, and broader IT environments to respond quickly to malicious operations.

BENEFITS

- **Accelerate threat detection & response**

  Sysdig's CDR alerts are ingested by Cybereason XDR to correlate and provide insights into the end-to-end attack story. Analysts can take rapid action based on recommended responses.

- **Comprehensive attack prevention**

  Get deep visibility into cloud and container activity. Gain a comprehensive view that spans across identities, endpoints, email networks and the cloud for threat correlation and response.

Sysdig CDR

Cybereason XDR

Better Together

Sysdig CNAPP

Stop cloud attacks 10x faster

Safeguard against threats with comprehensive detection and response

Reduce vulnerability noise by up to 95%

Zero in on real risk with runtime intelligence on vulnerable packages

Identify, prioritize and control risks

Enhance Posture Management across multiple clouds

Cybereason XDR

Gain comprehensive visibility

Ingest all data across your enterprise to create a unified view

Reduce time to detect, investigate and respond

AI-based correlation provides the end-to-end attack story.

Enhanced analyst efficiency to stop attacks

Recommended Response enables analysts with rapid remediation

Who do we help together?

CTO   CISO   SOC Manager

VP, Security   VP, Cloud DevOps   VP, DevSecOps

Cloud Architect   Platform Architect

Security Architect   Security Analyst

THE FUTURE IS OPEN

We're committed to the open source community.

Falco   eBPF

Open Policy Agent   kubernetes

Prometheus   WIRESHARK

sysdig

Secure Every Second.
